

A world leading high-tech PCB & IC substrates company

** For AT&S FY 2019/20

Leading provider of high-end PCBs and IC substrates Well positioned for the future

- Unique market position
 - Broad product portfolio to serve all growth markets
 - Long-standing customer relationships with technology and market leaders
 - Technology innovator due to continuous R&D efforts
 - Quality benchmark with outstanding process know-how, productivity and efficiency

Growth oriented strategy

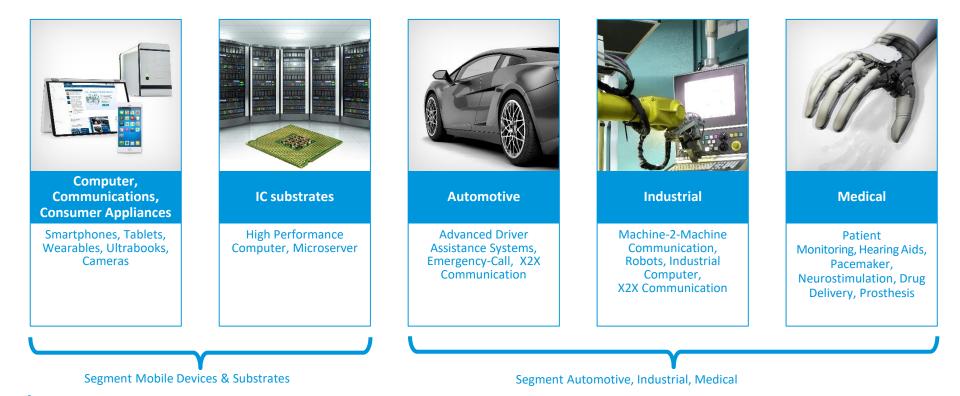

- Megatrend-driven markets with attractive growth potential
- Address growth opportunities with incremental investments

Sustainable profitability

- AT&S has constantly outperformed the PCB and substrates market over the last years
- EBITDA margin of 20 25% above industry average
- Strong cash flow generation and therefore improved internal financing capabilities
- Solid balance sheet and attractive dividend policy

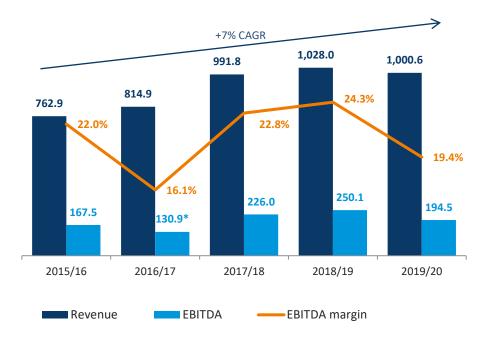

Market Segments & Product Applications

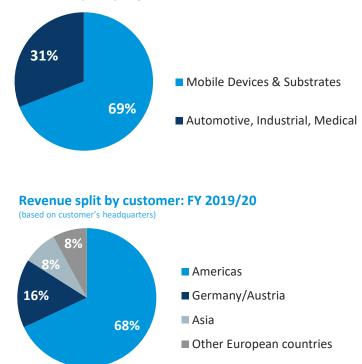

Investor and Analyst Presentation

Key facts FY 2019/20

Revenue split by segment: FY 2019/20

€ in millions • *Based on ramp-up effects for new plants in China

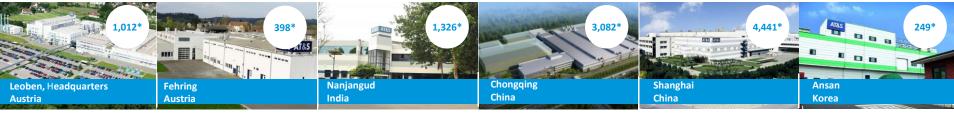

Global footprint ensures proximity to supply chain & cost efficiency

• AT&S sales support office

PCB & IC substrates market outlook

Investor and Analyst Presentation

Game changers for innovative applications

5G – The new standard for connectivity

+2.0% CAGR

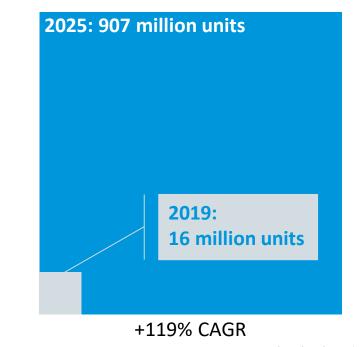

Significant growth opportunities ahead

Total smartphones 2025: 1.54 billion units

2019: 1.37 billion units

5G smartphones

IoT and Big data

Strong growth drivers for IC substrates

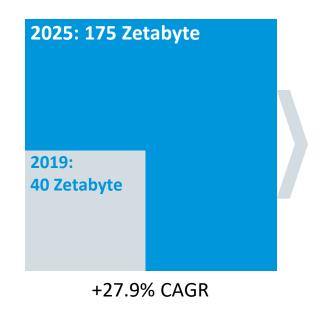

Connected devices

2025: 55 billion units

2019: 42 billion units

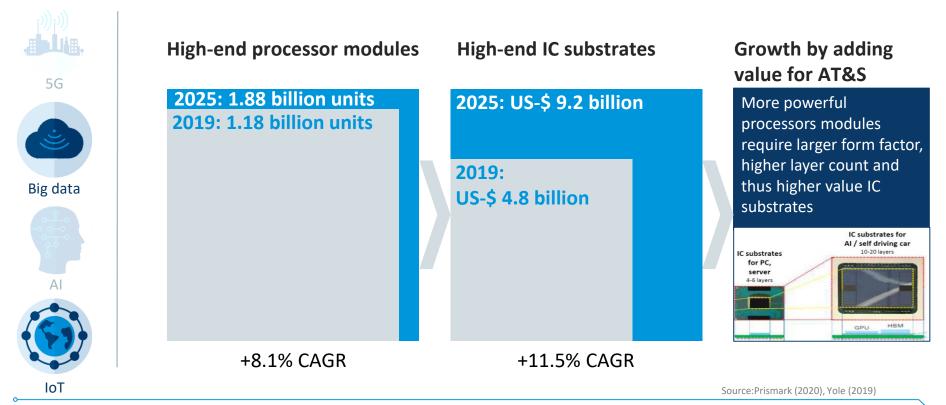

+4.6% CAGR

Global data volume

IoT and Big data

Strong growth drivers for IC substrates

IoT and Big data growth drivers for IC substrates

- IC substrates market should show strong growth of 11 % (CAGR) until 2025
- Strategic focus on business with IC substrates to follow the trend of the heterogeneous module integration
- Increase capacities and capabilities to become one of the leading providers of high-end IC substrates for high-performance computing
- Since 2016 serial production of IC substrates in Chongqing I
- Construction start of Chongqing III in 2019

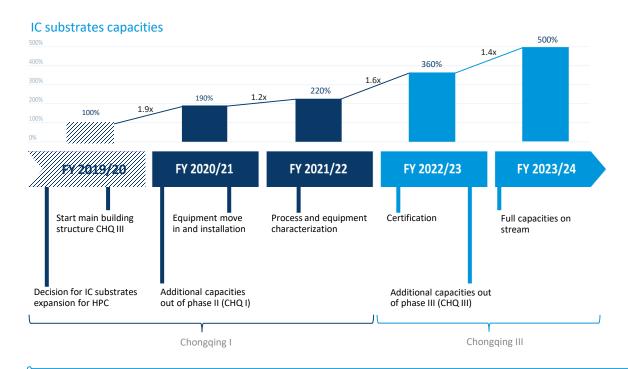

IC substrates business in Chongqing

Capacity expansion and technology investment pushed forward

- CHQ I:Despite COVID-19 the first patch of equipment was installed and qualified and the ramp up is on track
- Relevant revenue contribution out of phase II (CHQ I) expected in 2020/21
- CHQ3: Covid-19 related construction delay is below 7 weeks
- An improved qualification plan can compensate the delay of the construction and guarantee to meet the certification date

Module business

Modules & module integration

AT&S solutions for the electronics industry

Customer requirements driving demand for modularization

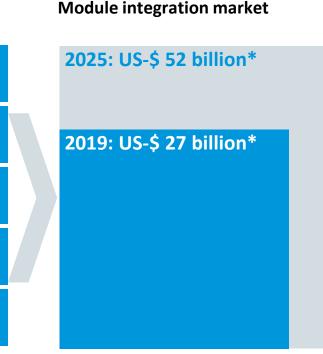

Increased functionality - lower space

Increased performance

Reduced time to market

Reduced cost

Scalable for various applications

- Changing customer requirements driving the need for modularization
- Strong growth potential in module integration market volume
- AI and 5G are further drivers for module integration

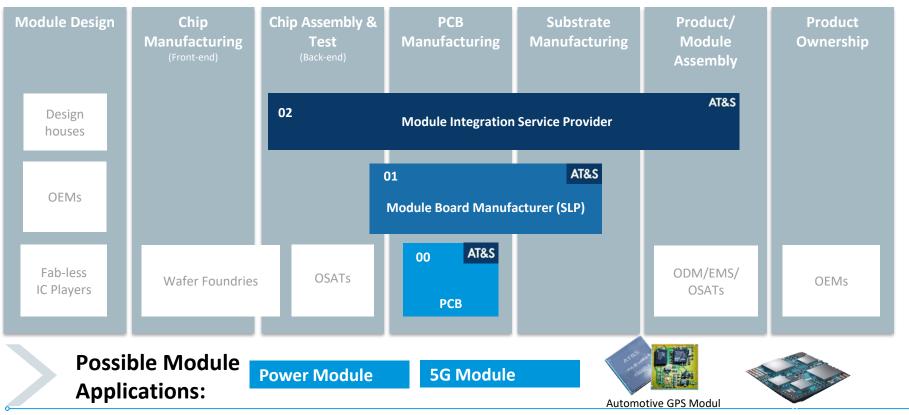

* Assembly and test only - excludes the value of Module PCBs/Substrates Source: A.T. Kearney (8/2018), AT&S (4/2020)

CAGR: 11.3%

AT&S solutions for the electronics industry

New business opportunities through entry into the module market

Global market development

Long-term trends largely unaffected, effect of COVID-19 with short-term impact

- Digital technologies and electronics are increasingly gaining importance for people's lifestyle
- Growth in data drives the need for processor modules and therefore high-end IC substrates
- Trade frictions still cause market uncertainty
- Unclear consumer behavior still causes low visibility especially in Mobile devices
- Despite increasing electronic content difficult market situation in the automotive sector is expected to remain in place for the time being
- Ongoing low industrial investment activity
- Medical market stable with positive demand for special applications

AT&S development in Q1 2020/21

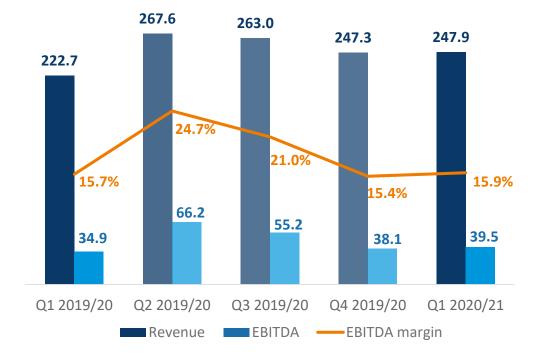

Strong first quarter despite challenging environment

- Excellent crisis management helped to mitigate impact on revenue
- IC substrates once again with strong demand
- Mobile Devices segment supported by customer and application diversification
- Drop in vehicle sales weighs on Automotive segment
- Industrial segment profits from better product mix
- Medical & Healthcare influenced by temporary unfavourable product mix

Revenue and EBITDA development

- Revenue and EBITDA positively influenced by currency effects
- Future technology generations require higher R&D spending
- Positive EBIT of € 0,2 million despite higher depreciation
- Net profit lower at € -7.5 million (PY: € -6.2 million)
- Operating free cash flow at € -53.8 million (PY: € -21.2 million) due to higher investment activity

in € millions

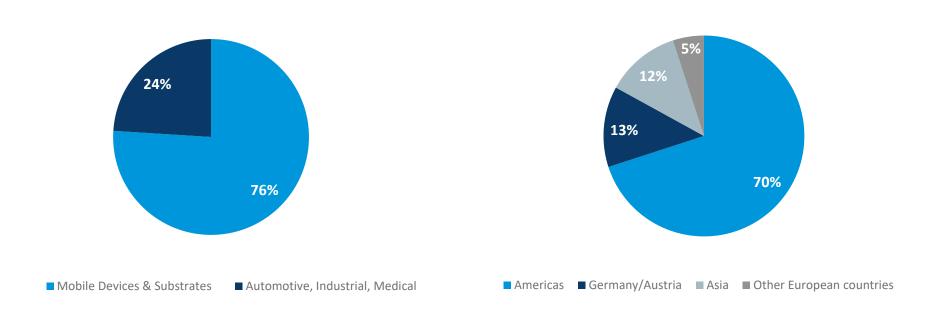

Revenue distribution Q1 2020/21

Revenue split by segment

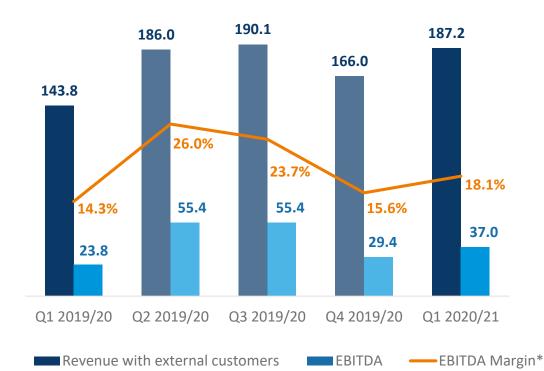

Revenue split by region

based on customer's headquarters

Business development – Mobile Devices & Substrates

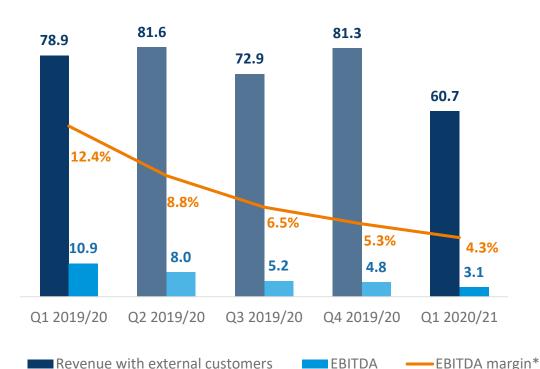

- IC substrates revenue driven by higher volume and better product mix
- Higher volume as well as broadened customer and application portfolio support Mobile Devices
- Revenue and earnings positively impacted by FX effects

in € millions; *Margin calculated from total business unit revenue

Business development – Automotive, Industrial, Medical

- Industrial segment shows solid development driven by better product mix
- Automotive segment burdened by strong decrease in vehicle sales
- Medical & Healthcare influenced by temporary unfavourable product mix

in € millions; *Margin calculated from total business unit revenue

Investor and Analyst Presentation

AT&S

Net CAPEX

Investments in IC substrates and technology upgrades main reason for increase

Balance Sheet

		31.03.2020	30.06.2020	Change in %
Total assets	Mio. €	1,853.5	1,980.1	6.8%
Equity	Mio.€	760.3	726.4	(4.5%)
Equity ratio	%	41.0%	36.7%	
Net debt	Mio. €	246.7	298.3	20.9%

Solid finance structure

Existing funds and cashflow generation help to meet repayments and capex needs

AT&S – Conference Call Q1 2020/21

Outlook for 2020/21

AT&S is well positioned to positively participate in intact market trends

- Future trends not harmed by COVID-19 pandemic
- Expectations for customer demand for the current year
- Product launches may be delayed in the Mobile Devices segment due to uncertain consumer sentiment
- Automotive market will not recover quickly to pre-crisis levels
- Industrial segment to remain at the level of previous year
- Slight growth expected for medical applications
- Demand for IC substrates remains strong according to current forecasts
- Q2 with revenue at the level of previous year and EBITDA margin within target range of 20 to 25%
- Outlook update as soon as economic framework conditions can be better quantified
- Investments in the IC substrate and module business to be consistently continued
 - Depending on market developments CAPEX for maintainance and tech-upgrade of up to € 80 million
 - CAPEX for strategic projects of up to € 410 million plus € 30 million due to timing variances

Medium-term guidance confirmed

Technology development to module integration and capacitiy expansion

First choice for advanced applications

Expansion of technology leadership

- Leading provider of new interconnect solutions
- Innovation revenue rate: > 20%

Focus on continued profitable growth

- Revenue target of € 2 billion
- Prosecution of sustainable margin improvement
- Medium-term EBITDA margin target of 25-30%

Creation of shareholder value

Medium-term ROCE above 12%

Sustainability management

- 80% renewable energy
- Eco-balancing of product groups
- 30 % women in management positions
