REACH Information Letter

Printed Circuit Boards supplied by AT&S are classified as articles according to the definition within the REACH regulation 1907/2006/EC. Therefore, these PCBs do not require any registration within the regulation 1907/2006/EC. Moreover, according to the different roles defined within REACH, AT&S can be seen as a "downstream-user", hence AT&S is neither required to register any substances nor to create and submit Material Safety Data Sheets.

To the knowledge of AT&S, there are currently no substances of very high concern >0,1% w/w (SVHC candidate list 191 substances) as well as no substances listed in Annex XIV or Annex XVII REACH regulation 1907/2006/EC contained in the PCBs except printed circuit boards ordered with surface HAL (In general, HAL is a lead containing surface). Nevertheless, AT&S will inform you, if we become aware that further ingredients of our PCBs are named in the candidate list, Annex XIV or Annex XVII by the European Chemicals Agency (ECHA) according REACH regulation 1907/2006/EC.

In order to comply with REACH requirements, we observe developments in this regard in our own interest, but also in consultation with our suppliers. We are therefore in close contact with all our suppliers for base materials and process chemicals and require REACH compliance also through our General Terms and Conditions.

This information letter refers to our current knowledge as per the date of this letter, stated above. AT&S does not assume any additional liabilities or duties based on or in relation to any information contained herein. Please be aware that AT&S, in any case, cannot take over any responsibility for any circumstance or event beyond AT&S reasonable control.

If you should have any further questions or concerns, we would be happy to assist you. In this case, please refer to the REACH Coordinator, whose contact details are stated below:

AT&S REACH Coordinator:

Thomas Rossmann

Industriepark 4

8350 Fehring

AUSTRIA
